

HOSE / CONVEYORS INCORPORATED

FLUID POWER & PNEUMATIC COMPONENTS

Clamps	Pneumatic push connect fittings
Cushioned Clamping & Support Systems	Pressure Gauges
Expansion Joints	Quick Connects (Hydraulic & Pneumatic)
Filter / Regulator / Lubricator	Swivel Joints
Hydraulic Adapters	Test Points
Hydraulic Motors, Pumps, Tanks	Tubing (Tube bending, flaring and Assemblies)
Manifolds	Valves (ball, needle, check, flow control)
Nipples & Fittings (Brass, Steel, Stainless, Plastic)	

RUBBER PRODUCTS

Lagging	Matting	Sheet rubber	Skirtboard
---------	---------	--------------	------------

CONVEYOR COMPONENTS

Bearings	Bushings	Motors	Shafting
Belt Cleaners	Chain	Motorized Pulleys	Skirting & Skirt Clamps
Belt Fasteners & installation tools	Elevator Bolts	Pulleys (Head/Tail)	Teflon (sheet or rod)
Belt maintenance tools	Elevator Buckets	Pulley Lagging	UHMW (sheet or extruded)
Belt Positioners & trainers	Electric motors	Rollers	V-belts, HTD, Timing
Belt Tracking Idler systems	Gear Boxes	Screw conveyor parts	
	Guide Systems	Sheaves	
	Idlers (flat, return, impact)

HOSE ASSEMBLIES

Hydraulic – Teflon – Industrial – Metal Hose & Assemblies - Up to 6" crimping capabilities!

OEM high production runs are a specialty of Hose/Conveyors Inc. Our lean flow process is perfect for the JIT demands of the OEM market place. This efficient, high speed process provides the highest quality and fastest production times.

HCI excels at secondary operations such as, flushing/capping, abrasion guard banding, branding/labeling and packaging operations. The Quality Control department stands ready to meet your QC needs. From pressure testing and pull testing, to setting up abrasion and lifecycle testing.

HCI is proud to be associated with the top manufactures in the world – Gates, Goodyear, Parker, Eaton and many specialty manufactures. Over half our OEM business is with a custom designed hose or fitting. Through HCI's leadership in the industry and partnership with the top manufactures in the world, our OEM customers feel confident their needs will be met.

PRECISION MACHINING

This department was first created to fulfill the custom fitting needs of our customers. It has since developed into a full service, state of the art machining division. We focus on meeting the exacting tolerance and machining needs of our customers.

While custom fittings are still a portion of the business HCI has grown to include any precision machining needs of our customers. We handle prototypes, short runs, high tolerance, and general machining needs. Secondary operations include de-burring, hardening, heat treating, plating, stamping, laser marking, painting and grinding.

Exacting tolerance and Quality Control is of the utmost importance. With the use of a Brown&Sharp Gage 2000 and various gage blocks, pins and micrometers, HCI delivers the quality, service and support needed by our customers.

Visit our Precision Machining page on the website for a complete listing of equipment and services.

DIE CUTTING

Hose/Conveyors Inc. has die cutting capabilities for a wide range of applications. From punching holes/perforations in conveyor belting and specialty machine belting to OEM production die cut runs. Our capabilities are specially suited for small to medium run projects.

The materials available include:

- * Gum rubber
- * Conveyor belting
- * Sheet rubber
- * SBR (Rubber)
- * Foam
- * Gasket materials
- * PVC and Thermoplastics
- * UHMW
- * Teflon
- * Etc.

Hose/Conveyors, Inc. looks forward to the opportunity to work with you on your die cutting needs.

BELTING

Hose/Conveyors has one of the largest and highest throughput shops in the country. We've designed and built all our own equipment to manufacture the highest level of quality and throughput available. Our Belt products group is ready and able to assist in belt design and selection. Hose/Conveyors is very pleased that our clients consider us to have set the industry standard for quality and service in the belting industry. Please visit the fabrication services page under Belt Products for more details.

Hose/Conveyors, Inc. has a full capacity belt fabrication shop for both Rubber and Thermo-plastic belting. Capable of the widest range of cleat arrangements for your belting needs.

ASSEMBLY / KITTING / PACKAGING

Many of our customers enjoy the convenience of ordering a single machine kit #. These kits' can include - hose assemblies, sub-assembly of components, belting, components and packaging. HCI is your partner for solutions in Supply Chain efficiency.
